

Release Notes

Update: v1.31.3

Web Browser

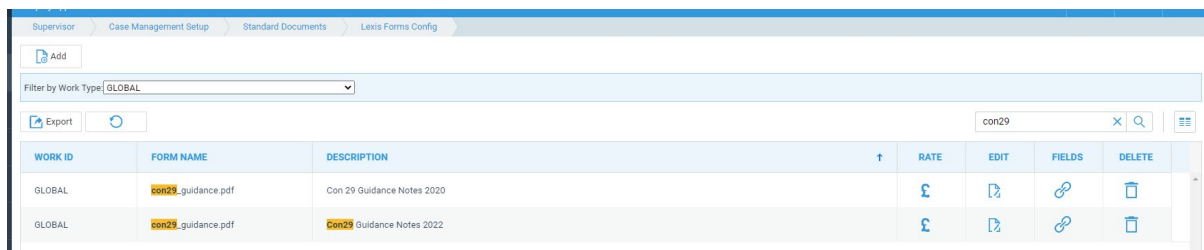

Contents

Lexis Nexis forms	3
Web Portal Custom Styles	3
Packages	4
Automatic Operating System Selection	4
Gateway App Refinements	4

Lexis Nexis forms

Previously, users could not add multiple versions of Lexis Forms that have the same form name, on the same worktype.

In this update, forms can be assigned custom descriptions, and multiple versions can be added and mapped.

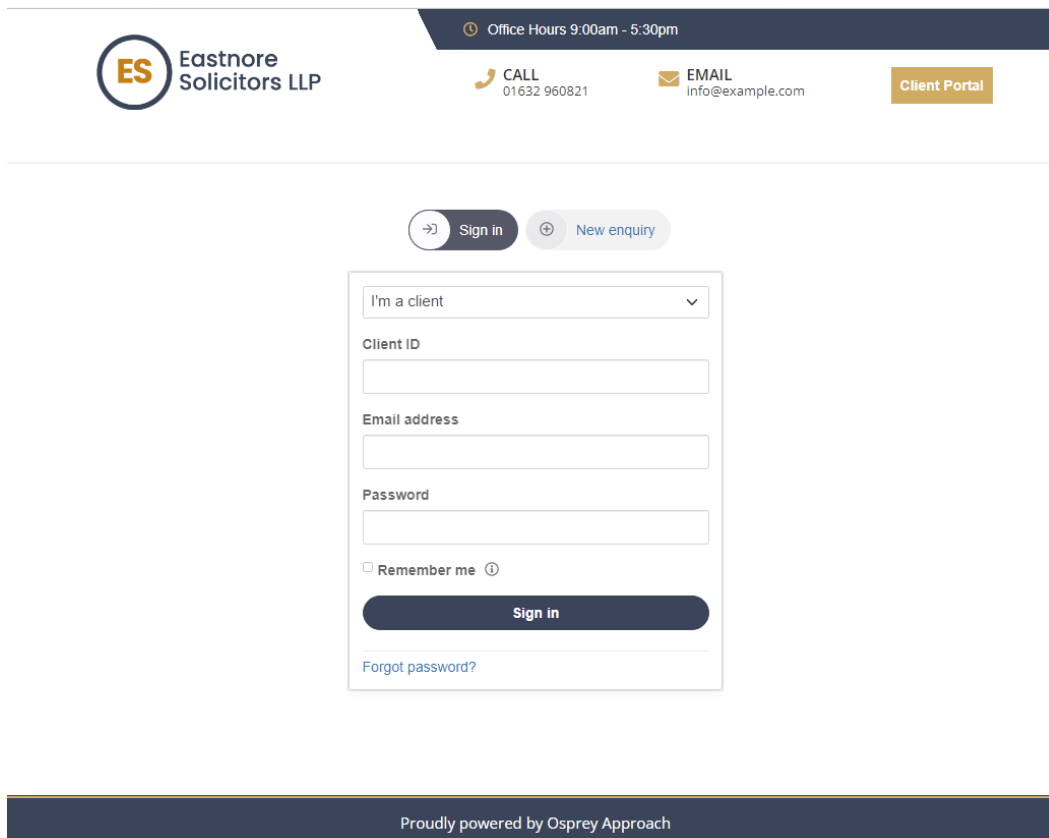

WORK ID	FORM NAME	DESCRIPTION	RATE	EDIT	FIELDS	DELETE
GLOBAL	con29_guidance.pdf	Con 29 Guidance Notes 2020	£			
GLOBAL	con29_guidance.pdf	Con29 Guidance Notes 2022	£			

Web Portal Custom Styles

Previously, firms could only customise the default banner colour, add a logo, and add social links to the portal.

In this update, Supervisors can now select to Use Custom Style Sheets, allowing further customisations.

Packages

Previously, some items were not displayed when downloading packages.

In this update, SMS messages, attendance notes, text only items, emails sent from Osprey, emails exported using the Office 365 add-in, and emails with attachments are now included.

Name	Type	Compressed size
94320_Sent a text message to the num...	Adobe Acrobat Document	2 KB
94321_Email from Osprey w word attac...	Adobe Acrobat Document	436 KB

94329_Email refno 94329.msg	Outlook Item	100 KB
94330_2.pdf	Adobe Acrobat Document	95 KB

Automatic Operating System Selection

When using MacOS, Osprey will automatically open the online Word editor when producing documents and running workflows.

Gateway App Refinements

Previously, when using the Gateway App, if a document is checked out for editing, and the document changes format (i.e..doc to .docx), this would prevent users being able to download and open them from Osprey.

The latest version of the Gateway App will no longer cause this issue.
