

Osprey Approach: Add Multi-Record Dossier Fields to Standard Documents

This help guide was last updated on Jul 10th, 2024

The latest version is always online at https://support.ospreyapproach.com/?p=17636

This guide will show you how to add multi-record fields into your standard documents

Multi Record dossiers offer a way to record an ever-growing table of data. This may be a list of assets and their values when working with a probate or divorce matter, or a table of invoice details for a debt recovery matter.

These then can be mapped into your Osprey documents as a table.

At least one Multi-Record Dossier must be set and populated with records.

Locate your Document

To add the dossier to a document, you must either decide to create a new document, or amend an existing one.

Refer to our "Create a new Standard Document" if you wish to create a new document.

Link fields to your document

Navigate to Supervisor > Case Management Setup > Standard Documents. Locate the document and select Fields.

Supervisor Case Manag	gement Setup Standard Documents
🕂 Add Standard Document	↔ Add Current Document
Document Type:	Standard 🗸
Filter by Work Type:	All 🗸
Filter by Expert Type:	(None) 🗸
WORK ID	DESCRIPTION
\	multiline document
FWRCP	Multiline Document 🖉 Edit
	P Fields
	E-mails
	£ Rate

Locate the dossier page and link all the required fields to the document.

The merge field(s) related to Multi-Record Dossiers are not displayed by the Insert Merge Fields drop-down list, therefore, any other can be selected.

Right-click on the inserted Merge Field > Edit Field

«client no		
	Search the menus	_
	χ Cu <u>t</u>	
	[≞ору	
	Paste Options:	
	<u>C</u>	
	Depdate Field	
	<u>E</u> dit Field	
	Toggle Field Codes	
	A <u>F</u> ont	
	Ξ _¶ <u>P</u> aragraph	

Change the existing Name only by typing "TableStart:", then the Dossier Page ID

Field			?	×
Please choose a field <u>Categories:</u> (All) <u>Field names:</u> Fill-in GoToButton GreetingLine Hyperlink If IncludePicture IncludeText Index Info Keywords LastSavedBy Link ListNum MacroButton	Field properties Field name: TableStart:MultiDoss Forma <u>t</u> : (none) Uppercase Lowercase First capital Title case	Field options Text to be inserted <u>b</u> efore: Text to be inserted <u>a</u> fter: <u>Mapped field</u> V <u>e</u> rtical formatting		
MergeRec MergeSeq Next Description: Insert a mail merge field F <u>i</u> eld Codes		Preserve formatting during updates OK	Car	cel

Click OK to save the merge-field changes

Repeat the previous step into the last cell of the second row, but by typing "TableEnd" instead of "TableStart"

Field			?	×
Please choose a field <u>Categories:</u> (All) <u>Field names:</u> Fill-in GoToButton GreetingLine Hyperlink If IncludePicture IncludeText Index Info Keywords LastSavedBy Link ListNum MacroButton <u>MergeField</u> MergeSeq Next	Field properties Field name: TableEnd MultiDoss Format: (none) Uppercase Lowercase First capital Title case	Field options Text to be inserted <u>b</u> efore: Text to be inserted <u>a</u> fter: Mapped field Vertical formatting		
Insert a mail merge field		ОК	Can	cel

Insert merge-fields (any) into each cell from the second row of the table, including in the first cell immediately after "TableStart" merge-field and also into the last cell before "TableEnd"

Edit each merge field and rename it with the ID of the desired multi-record Dossier Field using the format «FieldID»

Header 2	Header 3
«Multi2»	«Multi3» «TableStart: MultiDoss»
⊢ «	leader 2 Multi2»

If necessary, add Totals into the last row in the same way, but using the format «PageID_FieldID_TOTAL» when editing this merge-field.

Once you are finished with your document template, close the document and save the template back into Osprey.

Producing your document

Running the document via Document production will show all dossier entries for your loaded client within your Word document.
