There are multiple ways to be able to locate a document within Osprey's matter history.

Filter Rows

All matter history column headings have search and sort facilities within them. In addition to this, you also can add more column headings. To the right-hand side of every column heading is a downward arrow. Click this to see the Columns option, and select/deselect any options you require.

CLIENT NO	CLIENT SURNA...	MATTEP
<input type="text"/>	<input type="text"/>	<input type="text"/>
B00002	Braithwaite	1
B00002	Braithwaite	1

Each column can be searched independantly, allow you to locate files quickly.

You can also customise the type of search, and how it is performed. Any settings changed are individual to the column heading you select and will retain for further searches.

On the right of each search heading is a cogwheel icon. Click this to open search options for the column.

	CREATED DATE	CREATED BY
	<input type="text"/>	<input type="text"/>
	30/04/2020 17:10:07	neil
	23/07/2019 10:58:58	neil
	23/07/2019 10:58:18	neil

Filter On

Filter On controls how the search operates.

- **Enter Key** will perform the search once you click enter.
- **Keyup** will automatically display searched results as characters are typed.

Filter Type

Filter Type enables you to control how your searches are performed.

- **Exact Filter** will match EXACTLY any text/numeric entries into the search area. If characters are omitted or added, no results will be found.

- **Starts with Filter** returns results that Start with what is typed. If any characters are incorrect, no search results will be returned.
- **Expression** is a wildcard filter allowing you to search for items where a terms starts with (cli*) ends with (*ent) or contains (*lien*) by using an asterisk in the correct place.
With numeric values, you can use expression such as greater than (>), less than (<), equals to (=) etc.

Once you have selected the relevant search filters, simply enter the search criteria into either one or multiple column headings to further refine your search.

Removing Filters

- **Clear Filter** clears the search criteria entered into the currently selected column.
- **Clear All Filters** clears all search criteria entered into all column headings.

When searching the file **Type** column, you need to just add the file type extension. For example, *doc*, *xls*, or *pdf* for Word, Excel and PDF files respectively. *Msg* will return E-Mails.

Keyword Search

The Keyword Search is found at the top of the matter history screen.

The image shows a search interface. At the top is a search bar with a magnifying glass icon. Below it is a navigation bar with several buttons: 'wnload', a triangle icon, a person icon, 'Publish to Deal Room', 'Finalize Version', and a circular refresh icon. Below the navigation bar is a table header with four columns: 'MATTER NO', 'MATTER DESCRIPT...', 'RETENTION PERIOD', and 'DETAILS' with a dropdown arrow.

You can access the search options by selecting the cog wheel symbol in the Keyword Search field.

Use this option to do a quick search on any detail, content or combination of both.

- **Details** will search any details such as processed date, created date, or description name. Full search criteria does not have to be entered but the criteria must have the correct beginning.
- **Content** allows you to enter a specific word, term or numeric value. The system will then search within contents of any documents, emails and OCR-compatible PDFs.
- **Details & Content** will search for a specific word or numeric value that may be held either within the metadata of an item or the content.

Searching across all Clients or Matters

If you wish to search for a matter history item across all clients and matters, you can click the X within the Matters (to show all matters for the loaded client) or X within the Client Number (to show all files).

Client No:    Global: Matter No:   

Searching By Date

You can also use the From and To date fields to filter for items created between a specific date range.

From:  To:
