This guide will take you through managing your stored passwords

To reduce potential security threats, Osprey strongly recommends that users do not store their Osprey credentials within their Browser or anywhere on their PC.

If your web browser has stored your password, you can view and remove it by following the below stages

Passwords in Google Chrome

Managing Passwords

1. On your computer, open Chrome.
2. At the top right, select Profile  > Passwords .
 - If you can't find the Passwords icon, at the top right, select More  > **Passwords and autofill** > **Google Password Manager**.
- **Show:** To the right of your password, select the Arrow  > Show password .
- **Edit:** To the right of the password, select the Arrow  > **Edit**.
- **Delete:** To the right of the website, select the Arrow  > **Delete**.

Password saving

By default, Chrome offers to save your password. You can turn this option off or on at any time.

1. On your computer, open Chrome.
2. At the top right, select Profile  > Passwords .
 - If you can't find the Passwords icon, at the top right, select More  > **Passwords and autofill** > **Google Password Manager**.
3. On the left, select **Settings**.
4. Turn **Offer to save passwords** on or off.

Passwords in Microsoft Edge

Managing Passwords

1. On your computer, open Microsoft Edge.
2. At the top right, select **Settings and more ...** next to the Profile  icon.
3. Select **Settings**.
4. Select **Profiles** > **Passwords**.

- **Show:** To the right of your password, select the Show Password  icon.
- **Edit:** To the right of the password, select ... > **Edit**.
- **Delete:** To the right of the website, select the ... **Delete**.

Password saving

By default, Edge offers to save your password. You can turn this option off or on at any time.

1. On your computer, open Microsoft Edge.
2. Select **Settings and more** > **Settings** .
3. Select **Profiles** > **Passwords**.
4. Turn on or off **Offer to save passwords**.
