You can get started by exploring the APIs in the [documentation](#).

Cancel

Save

## Switch on address locator

Navigate to Supervisor > System Setup > Configuration Settings. Locate the switch called Address Locator, right click to edit and select Postcode Anywhere from the list. Save your changes.

Supervisor > System Setup > Configuration Settings > ... > Edit

Save Cancel

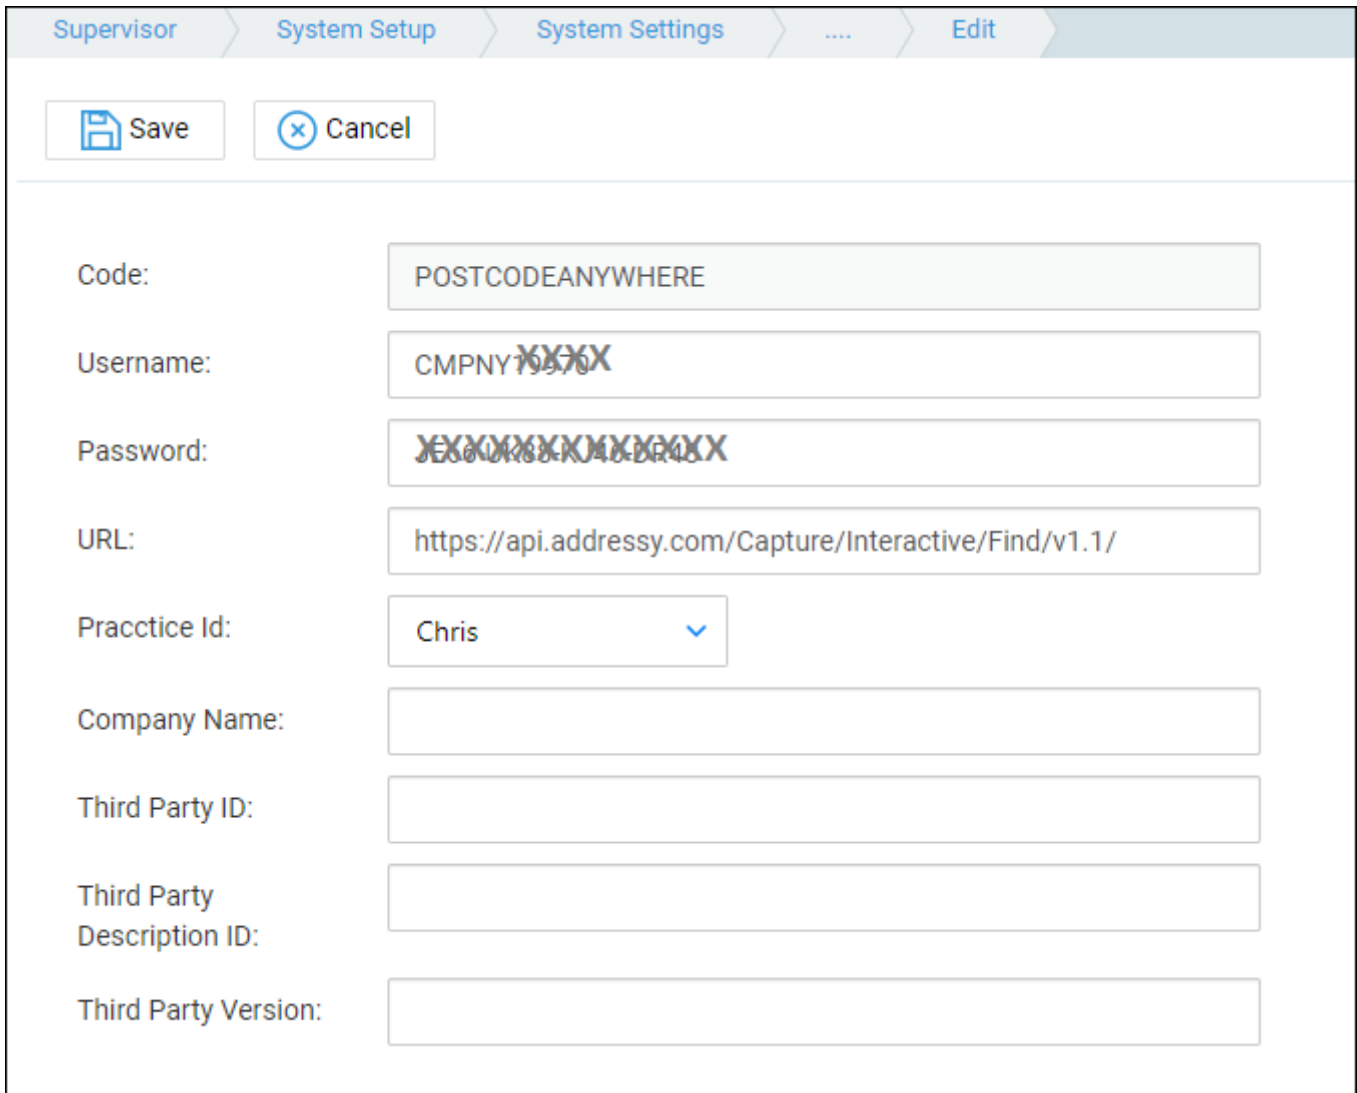

Switch Name: Address Locator

Switch Value: Postcode Anywhere

## Link Osprey to your Loqate account

Navigate to Supervisor > System Setup > System Settings > Third Party Data.

Locate the POSTCODEANYWHERE setting and right click to edit.

The screenshot shows a web-based configuration interface. At the top, there are navigation tabs: 'Supervisor', 'System Setup', 'System Settings', and 'Edit'. Below the tabs are two buttons: 'Save' (with a floppy disk icon) and 'Cancel' (with a red 'X' icon). The main area contains several form fields:

- Code:** A text input field containing 'POSTCODEANYWHERE'.
- Username:** A text input field containing 'CMPNY19570' with 'XXXX' overlaid in red.
- Password:** A text input field containing 'XXXXXXXXXXXXXXXX' with 'XXXXXXXXXXXXXXXX' overlaid in red.
- URL:** A text input field containing 'https://api.addressy.com/Capture/Interactive/Find/v1.1/'.
- Pracctice Id:** A dropdown menu with 'Chris' selected and a blue downward arrow.
- Company Name:** An empty text input field.
- Third Party ID:** An empty text input field.
- Third Party Description ID:** An empty text input field.
- Third Party Version:** An empty text input field.

- Username - set this to your unique account code received by email when you signed up.
- Password - this is the API service key you generated in the Let's get started section.
- URL: set this to <https://api.addressy.com/Capture/Interactive/Find/v1.1/>

## Use the address locator

Once you have followed the steps above, Osprey will allow you to search for addresses given a post code.

Where you see the icon below, you can use this button to look up an address from the entered post code:

The image shows a horizontal input field. On the left, the text 'Postcode:' is displayed. To the right of the text is a large, empty rectangular input area. At the far right end of the input area is a yellow square button containing a magnifying glass icon.

Enter the post code, and click the magnifying glass icon. You will then see below a list of found addresses to choose from.
