This guide will take you through setting access permissions on your reports library

By default, every user whose access template allows them to see **Reports (New)** will be able to run all of the reports in there.

You may wish to limit access to certain reports in the **Reports (New)** section of Osprey

Firstly, navigate to **Reports (New)**

You will then see all the reports available to you.

Right click on a report that you want to amend access too and select **Set permissions**

A screenshot of a web application interface showing a table of reports. The table has columns for Label, Report Type, Description, Created By, Created Date, Last Modified By, and Last Modified Date. A context menu is open over one of the rows, showing options: Run, Set permissions, Schedule Report, View Schedulers, Delete, and Refresh. The 'Set permissions' option is highlighted.

Label	Report Type	Description	Created By	Created Date	Last Modified By	Last Modified Date
Report Type: Reports Library						
Accounts - *Bills Rendered With Vatable Disbursements	Reports Library	Bills filterable by ...	Supervisor	05/09/2023 10:2...	Supervisor	05/09/2023 10:2...

Save Cancel

Or via Security Templates

The double arrow pointing to the right, at the top will move over all users or templates into the **Selected** window and grant them all access to the report.

The single arrow pointing to the right, allows you to click on one user or template and move them to the **Selected** window, granting them access to the report.

The left pointing arrows allow you to remove access permissions for users or templates.

Once you have set the required access permissions, click **Save** at the bottom of the box.
