You can set IP restrictions so you can determine what IP addresses can access your Osprey database.

Firm-wide restrictions

To set up a firm-wide IP restriction, go to 'Supervisor' > 'System Setup' > 'System Settings' and then click on the 'Edit' icon.

Add in the IP address and a description, then click the 'Save' button. Now only users with that public IP address may log in.

IP:

Cancel

Save

Description:

Repeat as necessary.

User-specific IP restriction

You may wish to set up a user IP restriction so that the user can only log in from a set IP address.

Navigate to the 'Supervisor' tab and then go to 'System Setup'. Select the 'Users' option. Right click on the user you want to add the restrictions for and select edit.

IP Restrictions

!

Leave empty to grant full access. Any restrictions defined at the system level will apply though.

IP:

Cancel

Save

Description:

Edit

Delete

Add the IP address and description, click the 'Save' button next to the description field, then click the 'Save' button at the top to confirm the user details.
