Osprey Approach: TextAnywhere

Click here for a printer-friendly version

This guide will go through our TextAnywhere integration

Build stronger relationships with your clients, with Osprey's TextAnywhere integration.

Keep clients informed

Keep your clients updated with SMS updates as you progress through matters, with a personal touch that emailing can't achieve.

Trigger text messages at agreed stages of your workflows for timely updates or send a quick reminder with an ad-hoc text message.

Automatically stored into Osprey

Any SMS messages sent from Osprey will automatically be saved into Osprey, helping keep track of any written correspondence on the matter.

Personalised text messages

Text templates help produce personalised text messages at the click of a button. This pulls through captured data into the text message, ensuring each communication stays on brand.
