

# Osprey Approach: Use Custom Auto Posting

This help guide was last updated on  
Apr 18th, 2024

The latest version is always online at  
<https://support.ospreyapproach.com/?p=17230>

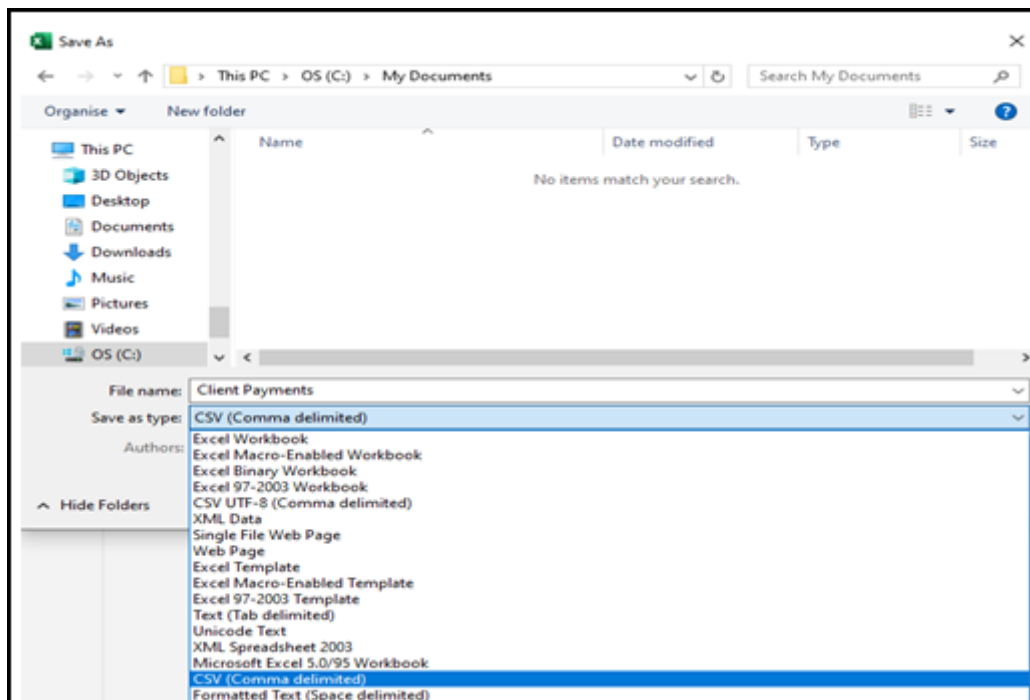

Osprey has a number of automatic posting options which you can use to speed up your input. Given a CSV file containing all of the postings you need to make, in the correct format, Osprey can post these for you. Auto posting is available for:

- Cost Transfers
- Client Bank Receipts
- Client Bank Payments
- Matter Addition

## Prerequisites

To use the Cost Transfer auto posting you must be running under the Standard style of VAT. This is because Cash Accounting firms need to fill in the VAT Cash Accounting question when posting a cost transfer to correctly reflect the VAT being recovered.

All files for uploading must be saved as CSV (Comma Separated Values) files. This can be done using the Save As option within Excel, and choosing Comma Delimited:

All Banks that you wish to use for auto posting must have their bank account numbers set:

Supervisor > Financial Setup > Banks > Edit Bank Details

Save Cancel

Account Type: Bank  
 Account Code: 1189  
 Account Description: HSBC - Client A/C

**ADDRESS DETAILS**

Bank/Company Name: HSBC - Client A/C  
 House/Street:  
 Area:  
 Town:  
 County:  
 Postcode:  
 Email:  
 WWW:  
 Contact Name:

**BANK ACCOUNT**

Bank Type: Client  
 Set as default for branch ALL  
 Last Cheque Number: 000000  
 Cheque Template: None  
 Bank Account Number: 10061919  
 Bank Sort Code: 16-21-20

## Cost Transfer details

The auto posting will only allow posting from Client to Office, and not from Office to Client, nor from Client to Disbursements.

N.B. The Cost Transfer auto posting should ONLY be used if you are Standard style of VAT. This is because Cash Accounting firms need to fill in the VAT Cash Accounting question when posting a cost transfer to correctly reflect the VAT being recovered.

Example file:

|   | A      | B      | C            | D           | E           | F      | G                                   | H |
|---|--------|--------|--------------|-------------|-------------|--------|-------------------------------------|---|
| 1 | Client | Matter | Posting Date | Client Bank | Office Bank | Amount | Posting Ref                         |   |
| 2 | B00001 | 4      | 24/10/2019   | 10061919    | 10061920    | 550    | T24-10 Transfer Costs re bill 12468 |   |
| 3 |        |        |              |             |             |        |                                     |   |
| 4 |        |        |              |             |             |        |                                     |   |
| 5 |        |        |              |             |             |        |                                     |   |

**Columns:**

**Client** – should be the client number of the client you wish to post to.

**Matter** – should be the matter number of the client/matter you wish to post to.

**Posting Date** – the date of the cost transfer.

**Client Bank / Office Bank** – these must be the bank account **numbers** of the client/office bank that the costs are coming from/going to (see Page 2).

**Amount** – the amount of the transfer, positive figure.

**Posting Ref** – this will be used for both the posting detail, and the posting reference. In the example above, the reference is placed prior to the detail, so the detail of the posting will be as shown, and the reference will be T24-10.

# Client Bank Receipt details

The auto posting posts a client bank receipt into each client/matter’s ledger.

**Example File:**

The image shows the Microsoft Excel Home ribbon with the following options: File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View. The ribbon is divided into three groups: Clipboard (Cut, Copy, Paste, Format Painter), Font (Calibri, 11, Bold, Italic, Underline, Paragraph, Color, Background Color, Text Color), and Alignment (Left, Center, Right, Indent, Decrease Indent, Increase Indent, Wrap Text, Merge & Center). Below the ribbon is the formula bar showing 'D9' and a formula entry field. The main grid shows a table with the following data:

|   | A      | B      | C            | D                    | E           | F      | G           | H |
|---|--------|--------|--------------|----------------------|-------------|--------|-------------|---|
| 1 | Client | Matter | Posting Date | Posting Detail       | Client Bank | Amount | Posting Ref |   |
| 2 | B00001 | 4      | 23/10/2019   | Received from Client | 10061919    | 1800   | RCPT        |   |
| 3 |        |        |              |                      |             |        |             |   |
| 4 |        |        |              |                      |             |        |             |   |
| 5 |        |        |              |                      |             |        |             |   |

**Columns:**

**Client** – should be the client number of the client you wish to post to.

**Matter** – should be the matter number of the client/matter you wish to post to.

**Posting Date** – the date of the receipt.

**Posting Detail** – the detail of the receipt.

**Client Bank** – this must be the bank account **number** of the client bank that the receipt is received into (see page 2).

**Amount** – the amount of the receipt, positive figure.

**Posting Ref** – the reference for the receipt.

# Client Bank Payment details

The auto posting posts a client bank payment into each client/matter’s ledger.

**Example File:**

|   | A      | B      | C           | D           | E      | F          | G                           | H |
|---|--------|--------|-------------|-------------|--------|------------|-----------------------------|---|
| 1 | Client | Matter | Posting Ref | Client Bank | Amount | Date       | Posting Detail              |   |
| 2 | B00001 | 4      | 108934      | 10061919    | 1200   | 24/10/2019 | To client - monies returned |   |
| 3 |        |        |             |             |        |            |                             |   |
| 4 |        |        |             |             |        |            |                             |   |

**Columns:**

**Client** – should be the client number of the client you wish to post to.

**Matter** – should be the matter number of the client/matter you wish to post to.

**Posting Ref** – the reference for the posting.

**Client Bank** – this must be the bank account **number** of the client bank that the payment is coming from (see page 2).

**Amount** – the amount of the payment, positive figure.

**Date** – the date of the payment.

**Posting Detail** – the detail of the payment.

## Matter Addition details

This auto posting allows you to add new matters to existing clients. To import new Clients, please use Smart Actions.

**Example File:**

|   | A      | B       | C      | D    | E           | F                | G          | H         |
|---|--------|---------|--------|------|-------------|------------------|------------|-----------|
| 1 | Client | Our Ref | Branch | Dept | Date Opened | Case Description | Fee Earner | Work Type |
| 2 | B00001 | 15      | 2      | 2    | 12/10/2019  | Criminal damage  | MB         | CRIME     |
| 3 |        |         |        |      |             |                  |            |           |
| 4 |        |         |        |      |             |                  |            |           |

**Client** – the client number to which you want to add the new matter.

**Matter** – the new matter number – must not already exist.

**Branch** – the branch you wish to save the new matter under.

**Dept** – the department you wish to save the new matter under.

**Date Opened** – the opening date for the matter.

**Case Description** – the matter description.

**Fee Earner** – the fee earner ID of the fee earner who will be dealing with the matter.

**Work Type** – the work type ID for the new matter.

## Perform the import/auto posting

Once you have set up your file(s) for uploading, navigate to Client Ledgers > Custom Auto Posting, and select the relevant radio button, followed by Choose file.

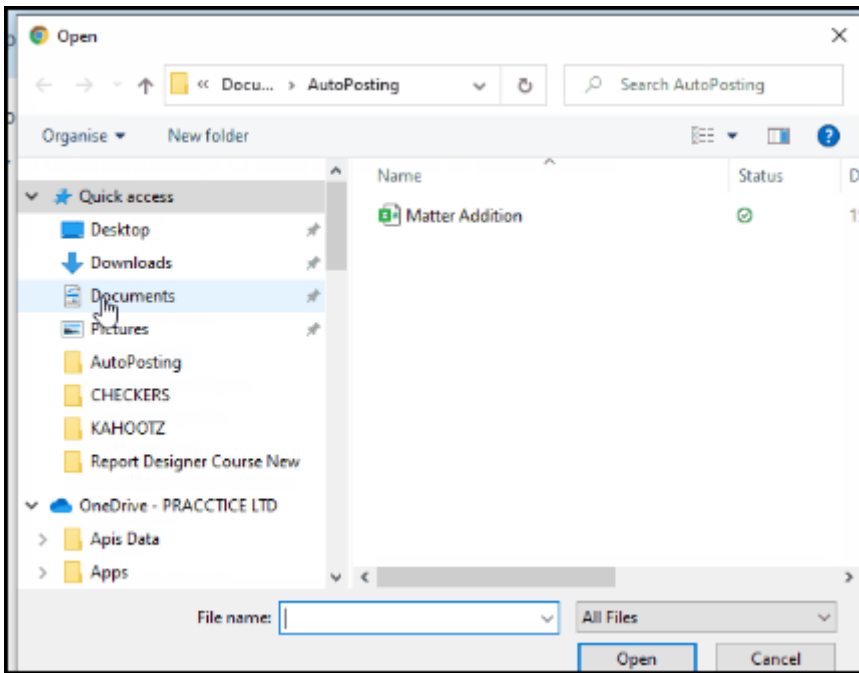

Client Ledgers > Custom Auto Posting

Please upload the csv file containing the auto posting input data

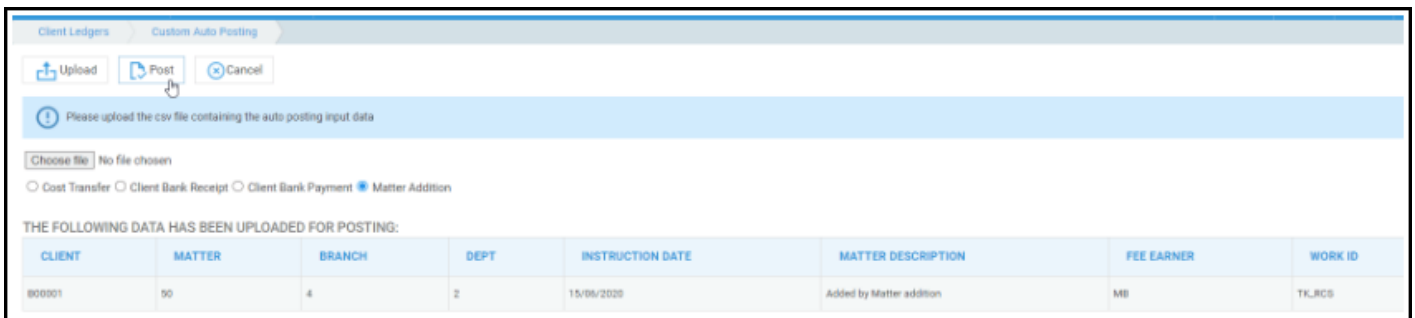

No file chosen

Cost Transfer
  Client Bank Receipt
  Client Bank Payment
  Matter Addition

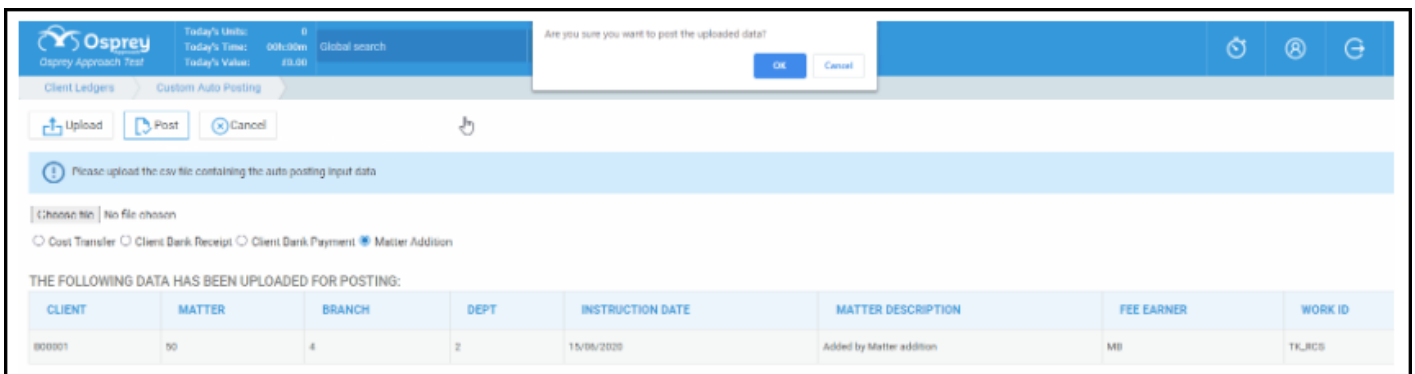

Select and open the file you wish to use for the upload – the file name will then be shown:

Click Upload. The data in your CSV file will then be displayed, showing any errors or issues the system may have come across:

**CHECK THE DATA that you are about to upload. There is no simple way to rectify any mistakes. When you are happy, click Post to upload the data. Any issues found will be reported:**

# Example Sheets

Click below to download an Excel Spreadsheet containing example layouts for the auto posting routines explained above.

Please see the custom auto posting example spreadsheet here >
