This guide will show you how to whitelist an address in Gmail

If you are having issues receiving emails from certain addresses into your Gmail account, you can whitelist them. For example, your Osprey user ID is set up with a Gmail email address, but you are not receiving your 2FA (Two Factor Authentication) code to log in.

Log into your Gmail account. Click the cog icon in the top right hand corner, and select See All Settings:

Select Filters and blocked addresses:

Settings

If the email address you are attempting to receive mail from is listed in the section headed The following email addresses are blocked..., remove it by placing a tick in the box alongside it, and clicking Unblock selected addresses.

Settings

[General](#) [Labels](#) [Inbox](#) [Accounts and Import](#) [Filters and blocked addresses](#) [Forwarding and POP/IMAP](#) [Add-on](#)

The following filters are applied to all incoming mail:

Select: [All](#), [None](#)

[Export](#)

[Delete](#)

[Create a new filter](#) |

The following email addresses are blocked. Messages from these addresses will appear in Spam:

You currently have no blocked addresses.

Select: [All](#), [None](#)

[Unblock selected addresses](#)
